EDUCATION

Vidya Pratishthan 's Kamalnayan Bajaj Institute of Engineering and Technology Pune, Maharashtra
Bachelor of Technology in Computer Engineering | CGPA: 8.65 Sept. 2024 – June 2028

EXPERIENCE

Student Developer and Independent Builder Aug. 2024 – Present
Pune, India

- Built and deployed multiple web-based projects including event websites, multilingual platforms, and voice-enabled applications using modern web technologies
- Exploring Artificial Intelligence and Machine Learning fundamentals with a focus on integrating intelligent features into practical applications
- Currently developing and updating a Voice assistant using ESP32 (Flask, Gemini API, ArduinoIDE).
- Actively building full-stack development skills through hands-on projects in web technologies, APIs, and responsive application design

PROJECTS

Voice Assistant using ESP32 | C++ (ArduinoIDE), ESP32, IoT 2025

- Designed and developed a cloud-connected AI voice assistant using ESP32 with real-time voice input and audio response capabilities.
- Integrated speech recognition, AI response generation (Gemini API), and text-to-speech for interactive voice communication.
- Implemented I2S-based digital audio processing using INMP441 microphone and MAX98357A amplifier for seamless voice interaction.

Intelligent Multi-Agent AI Exam Planner | Python, Streamlit, Groq API, LLaMA Models, SQLite 2026

- Developed an AI-powered multi-agent exam planning system that generates personalized, multi-subject study schedules with adaptive learning strategies based on progress tracking.
- Built an interactive dashboard using Streamlit featuring study analytics, progress visualization, smart insights, and structured subject-wise learning plans.
- Integrated Groq API with LLaMA models to provide automated topic explanations, adaptive study recommendations, and intelligent academic planning.

Bhasha Kisan – AI Chatbot for Farmers | Python, Javascript, AI/NLP 2025

- Developed a multilingual chatbot designed to assist farmers with agricultural queries such as crop selection, fertilizer usage, and weather insights
- Aimed at making agricultural knowledge easily accessible to rural communities with low digital literacy

Voice Notes Web Application | HTML, CSS, JavaScript 2024

- Created a browser-based application allowing users to record, store, and manage voice notes using Web Audio APIs
- Focused on clean UI design and intuitive user experience

E-Cell Website | HTML, CSS, JavaScript 2025

- Developed and maintained the website for the college Entrepreneurship Cell, showcasing events, announcements, and startup activities
- Improved the digital presence and accessibility of the E-Cell community

ACHIEVEMENTS

- Secretary of CESA (Computer Engineering Student Association)
- Won multiple technical and project competitions during the first two years of engineering
- Secured 1st position in ThinkBiz 2025. It was a business quiz competition organized by Vidya Pratishthan's Institute of Information Technology.
- ELysium Group Dance winners. Won a dance competition in 2nd year of engineering.
- Active participant in college technical events, innovation activities, and project exhibitions

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, HTML/CSS, Embedded C

Frameworks & Tools: StreamLit, Firebase, Node.js, React (basic), Arduino

Developer Tools: Git/GitHub, Android Studio, VS Code, JetBrains IDEs, Google Play Console, Vercel, Netlify, Cloudflare

Platforms: Linux (Ubuntu, Kali), LM Studio, Ollama (Local LLMs), ESP32/IoT Systems

INTERESTS

Chess, Football, Participating in debates, Technology exploration, Hackathons, Building software projects
